

Elections to Council Nucleus and Nominating committee 2024-2026

Motivation letter: Why are you interested in joining the Council Nucleus or Nominating committee (250 words max)?

Being in the field of cardio-oncology for more than 9 years, board certified by the International Cardio oncology Council, and being involved as a member of cardio-oncology study group at HFA for 4 years and co-authored several papers and consensus documents (some published and some submitted), it is important to be part of the cardio-oncology council as a nucleus member for several reasons:

- 1-represent my region (Lebanon and Lebanese society of cardiology and the Middle East region): as I initiated the first cardio-oncology clinic in Lebanon in 2018 and in 2022 the first UAE cardio-oncology clinic and trying to increase awareness and education in my country and the region on this new evolving field.
- 2- Share knowledge and experience and collaborate on research projects and multicenter studies and Cardio-oncology registry. Some projects are needed to study the knowledge and awareness of hematologists/oncologists and mainly cardiologist on cardio-oncology and surveys in different regions are important to shape the future plans in the ESC countries as well as non-ESC countries.
- 3-Spread the mission of the ESC Cardio-oncology council in Middle East region
- 4-With the support of ESC, organize ESC cardio-oncology educational activities in different regions of the Middle East region
- 5-Participate and improve social media awareness on cardio-oncology and ESC Cardio-oncology guidelines in several languages.
