

Dr. Anne DOMDEY, Novo Nordisk

Anne Domdey holds a Ph.D. in Immunology, a Master's degree in Biotechnology and has nearly 20 years of experience within the pharmaceutical industry. For the past 7 years, Anne has been highly dedicated to patient-focused drug development.

In her current role as Clinical Outcome Assessment Specialist at Novo Nordisk, Anne plays an important role in ensuring the comprehensive capture of patients', clinicians', and observers' insights throughout drug development for cardiovascular diseases and Alzheimer's Disease. Her focus encompasses development and implementation of Clinical Outcome Assessment strategies, alongside the utilization of in-trial interviews to interpret outcomes, providing essential support for Health Authority and Health Technology Assessment decision-making processes.

In her prior positions as Senior Global Health Economic Outcome Research Lead and Global Market Access Manager, she has been part of several projects filling data gaps from clinical trials, conducting insightful health economic analyses, and developing value communication strategies for medical products.

Throughout her career, she has achieved significant milestones, including the collection of pivotal patient insights instrumental for regulatory approvals, label claims, reimbursements, and the successful launch of new medical products in various disease areas.
