

Dr. Monika GRATZKE, Germany

As European Head of Medical Innovation & Digital Strategy, Dr. Gratzke is leading innovation at Daiichi Sankyo as part of Medical Affairs Specialty Business Unit. Her current focus is implementing GenAI in Medical Content Generation and building the strategy for the usage of AI in clinical trials.

Before joining Daiichi Sankyo, she was heading Medical Affairs at kry livi, Europe's leading digital healthcare company, as Global Medical Director after co-founding the German affiliate and launching the product in Germany.

Dr. Gratzke is a trained specialist in intensive care and is building on abroad clinical experience at the Ludwig-Maximilians-University, Munich, having served as Deputy Head of Neurosurgical Intensive Care and further cardiac surgical intensive care for several years. She is further specialized in anaesthesiology, pain therapy, emergency medicine and general medicine and is still active in emergency care.

In addition to her work as a Board member in the digital start up field, she is an expert to advise the Innovation Committee at the German Joint Federal Committee (Gemeinsamer Bundesausschuss, GBA).
