

## Mr. Marcel ALBERTI, Netherlands

Marcel Alberti is a digital health executive and co-founder at HealthSage AI, a leading startup that leverages Generative AI for Healthcare. The company focuses on structuring clinical text to simplify complex data management, improve efficiency by automating administrative processes, and uncover new insights from existing data sets.

Before founding HealthSage AI, Marcel spent 10 years at Philips. During his tenure at Philips, he held various leadership roles in strategy, product development, and business management mainly within the Healthcare Informatics business.
