

Dr. Andres LAGUNA, Novartis

Andres Laguna is a Worldwide Medical Affairs Director in Cardiovascular, Renal and Metabolism at Novartis. Among other responsibilities, he is leading a phase 2 clinical trial and multiple medical strategic activities. Additionally, he has successfully established research collaborations with academic partners, further enhancing Novartis's scientific endeavors.

Prior to his current position, Dr. Laguna spent 12 years in academia working in the field of cardiovascular medicine. Throughout his academic career, he mainly conducted his research at Harvard Medical School / Brigham and Women's Hospital and at Karolinska Institute (last position: Assistant Professor in Translational Cardiology at Karolinska Institute). Dr. Laguna holds an honorary position as Corresponding Academic at the Royal Academy of Medicine Comunidad Valenciana.
