

Dr. Anna TAVRIDOU, EMA

Anna holds a degree in pharmacy and earned her MSc and PhD degrees from Newcastle University (UK). Her previous professional experience comes from an academic environment as well as the pharmaceutical industry. From 2004-2015, she held academic positions in the Department of Pharmacology at the Medical School of Democritus University of Thrace (Greece). She conducted research on the development of novel molecules with antiatherosclerotic properties and genetic pharmaco-epidemiology that resulted in a number of publications in peer-reviewed journals. In 2015, Anna joined the EMA Secretariat of the Scientific Advice Working Party as a scientific officer supporting Scientific Advice procedures and liaising with CAT in advanced therapy procedures.
