

Dr. Changfu WU, FDA

Changfu Wu, Ph.D., is a Senior Biomedical Research and Biomedical Product Assessment Service (SBRBPAS) Expert in FDA's Center for Devices and Radiological Health, where he performs scientific and regulatory reviews of heart valve devices and ventricular assist devices. He obtained his doctoral degree in mechanical engineering in 2003 from the Center for Applied Stochastics Research and Department of Mechanical Engineering at Florida Atlantic University. Prior to joining FDA in 2009, Dr. Wu completed his post-doctoral training in joint biomechanics at the Musculoskeletal Research Center of the University of Pittsburgh, and conducted academic research at the Artificial Organs Laboratory of the University of Maryland School of Medicine. Dr. Wu is a Fellow of the American Institute for Medical and Biological Engineering (AIMBE).
