7. Why are you interested in joining the EACVI Board (300 words max)?

I am an enthusiastic multi-modality imager, although CMR is my first love and greatest passion.

I am the current EACVI CMR councillor and I am applying for a second mandate because the experience as board member greatly exceeded my expectations. As member of the EACVI board I felt part of a group with a common vision, working together in the interest of the Association's members and I am really proud to have contributed to the achievements of the group over the past two years. It was also an incredible chance both for professional and personal growth and I am really grateful to all the current board members who made it possible through their experience, kindness and friendliness. I enthusiastically participated in the activities of the board and I am confident that the experience I've gained would allow a more active and fruitful contribution, should I have the possibility to join the board for a second mandate, which would also give continuity to the path undertaken. I am really honoured and thankful for the trust I've been given so far and for the opportunity I've had to join the board and I hope you will consider my application for the position of CMR councillor. The EACVI has become a family to me and I will always be keen to contribute to its activities.
