7. Why are you interested in joining the EACVI Board (300 words max)?

I am deeply passionate about echocardiography, which has been the cornerstone of my professional activity. My journey in echocardiography has showed me the potentialities and the difficulties of the discipline, and it has also fostered a genuine commitment to improving patient care through advanced imaging techniques.

As an experienced professional and FEACVI since its first establishment , I have witnessed the impact that echocardiography can have in imaging and clinical arena. This drives my desire to contribute to the EACVI as Ordinary Nominating Committee. My expertise combined with my dedication to continuous learning and innovation would help me in this important role to guide the future directions of echocardiography within the EACVI.

Through my contribution and vision, I would strengthen and promote the excellence of the EACVI membership and its network of partner societies beyond the European horizon. Thanks to my working experiences in Europe , the US and the Middle East, I believe to be well positioned to improve the interchange of knowledge and research activities in cardiovascular imaging international scenario. Indeed, I am deeply motivated to collaborate with leading experts, share knowledge, and work towards common goals that will enhance the practice of echocardiography across Europe and the world.

Furthermore, I am particularly interested in promoting education and training initiatives, as well as supporting research that pushes the boundaries of what echocardiography can achieve. Therefore, I would strongly support the enthusiasm of the young members and encourage their active participation in the society life . I would also employ my international experience to promote the growth of international employment opportunities, creating value especially for the young community.

In conclusion, joining the EACVI as a Ordinary Nominating Committee would be an honor and a responsibility that I am eager to undertake. I am committed to bringing my experience, enthusiasm, and vision to this role, and I look forward to the opportunity to contribute meaningfully to the advancement of echocardiography and spread the vision of excellence of EACVI worldwide.
